EDUCATION

Georgia Institute of Technology

Bachelors of Science in Computer Science

GPA: 4.0

Atlanta, GA

Aug 2023 – May 2026

Relevant Coursework: Object Oriented Programming, Data Structures and Algorithms, Discrete Mathematics, Computer Organization and Programming, Objects and Design, Computer System and Networks

EXPERIENCE

Amazon Web Services

Software Development Engineering Intern

New York, NY

May 2025 – August 2025

- Incoming Intern on the Amazon Connect (AWS) team

Amazon

Software Development Engineering Intern

Seattle, WA

Sep 2025 – Nov 2025

- Leveraged **AWS CDK** and canary tests to automate **stress testing** of team's pipelines, enhancing monitoring coverage before critical Peak season.
- Created an automated onboarding workflow using internal Amazon QuickSuite tooling to provision **DynamoDB** tables for new Amazon warehouse locations, replacing a manual process and saving **10+ hours** of manual developer effort.
- Integrated code coverage + integration testing tools into CI/CD pipeline to ensure software stability across critical packages.

HubSpot

Software Engineering Intern

Boston, MA

May 2025 – Aug 2025

- Worked on **Ads Activation Paths**, an in-app guidance system that surfaces context-aware tips to Marketing Hub customers, boosting ad campaign activation by **40%** in internal testing, rolled out to over **800K customers**
- Developed a Spring Boot microservice with Spring Data JPA and Redis caching for banners, achieving an **85%** cache hit rate
- Collaborated with Ads/product teams to integrate **Google Performance Max (PMax)** campaign creation into HubSpot's ads tool, wiring new React/TypeScript flows to backend APIs

Littleton Youth Soccer Club

Software Engineer

Littleton, MA

May 2023 – May 2025

- Co-developed a responsive full-stack web application (Next.js, Tailwind CSS, Node.js) for LYSC evaluators to administer tryouts/manage dynamic player data.
- Built **RESTful APIs** to automate team generation for over **400 players**, optimizing database query efficiency and saving **40 hours** of manual administrative work.
- Created an intuitive **user dashboard** that replaced the prior paper-based system, driving a **92% satisfaction rate** from coaches (up from 78%).

RESEARCH

TEACHABLE AI Lab

Research Intern (ALOE-AI Initiative)

Georgia Institute of Technology, Atlanta, GA

Aug 2024 – Present

- Collaborating with PhD student **Jenn Redding** on the **Apprentice Tutors platform**, developing a web application for the Technical College System of Georgia (TCSG) to support **250** nurses in training.
- Co-author**, "Generating In-Context, Personalized Feedback for Intelligent Tutors with LLMs." Accepted to *IJAIED*, 2025.

PROJECTS

FanPlay — Frontend Developer

Aug 2024 – Present

- Developed the frontend of FanPlay, a **React Native app** projected to be used by **5,000** fans at Georgia Tech football games.
- Co-led the implementation of the **MVP voting feature** in FanPlay, enabling fans to cast votes and view real-time results.

TheRolePlayer.co, Co-Founder | MERN Stack

May 2024 – Aug 2025

- Built a sports blog aimed at **bridging the realms of finance and sports analytics**.
- Developed **RESTful API** endpoints using Node.js/Express to facilitate communication between the frontend and the article database (MongoDB).

TECHNICAL KNOWLEDGE

Languages/Frameworks/Libraries: Java, Python, SQL, C++, C JavaScript, TypeScript, NoSQL, Node.js, Angular, React, Next.js, Vite, Redux, Express, JUnit, Go, Swift, Spring

Developer Tools: Git, AWS, Postman, Google Cloud Platform, Google Apps Script, VS Code, Eclipse, IntelliJ

Extracurriculars: GT Football Video Operations Staff, GT Data Science Club, GOALS Soccer (Best Buddies Program)
